Task 3

The screenshot shows a console window titled "Console" with tabs for Physical, Config, CLI, and Attributes. The CLI tab is active, displaying a series of commands and their outputs. The commands include setting the hostname to "MyRouter", exiting configuration mode, and displaying the running configuration. The output shows the current configuration, including version 15.0, service timestamps, and a list of interfaces from FastEthernet0/1 to FastEthernet0/14.

```
Switch(config)# hostname MyRouter
MyRouter(config)# exit
MyRouter#
%SYS-5-CONFIG_I: Configured from console by console

MyRouter# show runnig-cofig
^
% Invalid input detected at '^' marker.

MyRouter#show running-config
