

Mpho Edward Makata

NET512 Practical week 1

Topology

```
S1>?
Exec commands:
  connect      Open a terminal connection
  disable      Turn off privileged commands
  disconnect    Disconnect an existing network connection
  enable        Turn on privileged commands
  exit          Exit from the EXEC
  logout        Exit from the EXEC
  ping          Send echo messages
  resume        Resume an active network connection
  show          Show running system information
  ssh           Open a secure shell client connection
  telnet        Open a telnet connection
  terminal      Set terminal line parameters
  traceroute    Trace route to destination
S1> t?
telnet terminal traceroute
S1> t
% Ambiguous command: " t"
S1> te?
telnet terminal
S1> te
% Ambiguous command: " te"
S1>enable
S1#
```

Which command begins with the letter 'C'?

Connect – Open a terminal connection

Part 2 Exec Modes

```

S1>enable
S1#?
Exec commands:
clear          Reset functions
clock          Manage the system clock
configure      Enter configuration mode
connect        Open a terminal connection
copy           Copy from one file to another
debug          Debugging functions (see also 'undebug')
delete         Delete a file
dir            List files on a filesystem
disable        Turn off privileged commands
disconnect     Disconnect an existing network connection
enable         Turn on privileged commands
erase          Erase a filesystem
exit           Exit from the EXEC
logout         Exit from the EXEC
more           Display the contents of a file
no             Disable debugging informations
ping           Send echo messages
reload         Halt and perform a cold restart
resume         Resume an active network connection
setup          Run the SETUP command facility
show           Show running system information
ssh            Open a secure shell client connection
telnet         Open a telnet connection
terminal       Set terminal line parameters
traceroute     Trace route to destination
undebug        Disable debugging functions (see also 'debug')
write          Write running configuration to memory, network, or terminal
S1#
S1# con
S1# configure
Configuring from terminal, memory, or network [terminal]?
Enter configuration commands, one per line. End with CNTL/Z.
S1(config)# exit
S1#
%SYS-5-CONFIG_I: Configured from console by console
S1#

```

2 C. There are 5 commands that starts with a C

### Part 3 Set the clock

```

S1# show clock
*19:31:23.698 UTC Sun Feb 28 1993
S1# clock?
clock
S1# clock ?
    set  Set the time and date
S1# clock set ?
    hh:mm:ss  Current Time
S1# clock set 13:40:00 ?
    <1-31>  Day of the month
    MONTH  Month of the year
S1# clock set 13:40:00
% Incomplete command.
S1# show clock
*19:35:38.621 UTC Sun Feb 28 1993
S1# clock set 13:40:00 31 Jan 2023
S1# cl
% Ambiguous command: " cl"
S1# clock
% Incomplete command.
S1# clock
% Incomplete command.
S1# show clock
13:41:57.99 UTC Tue Jan 31 2023
S1#

```

3 A. 1993

B. clock

C. hh:mm:ss Current Time

D. \*19:35:38.621 UTC Sun Feb 28 1993
